YEARS / TIME FRAME

WHERE

3,0 WEB DEVELOPER @ itievolution

📍 Tahiti, Pacific

I have spent the past 3 years working as a web developer in a small agency in Tahiti. I have learnt a lot from agency work due to diversity of projects and clients.

Responsibilities:

- Building database Models, APIs and Views utilizing Python, an array of Django web applications for the Public Office in Polynesia (Public Finance).
- Designed and developed a production tool for Nippon/Toyota, used to manage car servicing and aftercare(garage management system).
- Developed tools using Python, Shell scripting, REST APIs, and cron.
- Deployment of production applications using Linux, Nginx, Apache2, Unicorn, PostgreSQL.
- Created production environments on Digitalocean and Heroku.
- Developed front end applications using Twitter Bootstrap, CSS3 / HTML5.
- Carried out tasks related to full software development life-cycle (Project management etc.)

Comfortable using version control and agile development methodologies. An ambitious problem solver with a passion for online businesses.

I am now looking to find a great team(*and hopefully some mentors*) in order to grow as a developer. Truly interested in an environment that champions learning with great company culture.

EDUCATION & AWARDS

QUALIFICATIONS / CURRENTLY STUDYING / UDEMY
